Experience

February 2019 - Current time

Android developer at Tinkoff (tinkoff.ru)

Working in a team of highly skilled engineers, I develop the payment section of Tinkoff mobile app. Also, I'm a lecturer and a mentor in Tinkoff Fintech school.

- Development.
 - Payments by phone/card, QR, shake, Bluetooth. SWIFT and CIS transfers, templates/favorites, bills and many other stuff.
 - The oldest and biggest part of the Tinkoff mobile app.
- Fintech school.
 - I participate as a lecturer and a mentor in two online schools for Android developers.
 - I've given a lectures on Dagger2, and reviewed Android homework. Some students now work in Tinkoff.

Key skills & technologies employed:

• Kotlin, Java, Gradle, UI automation, public speech, code review, carefulness, responsibility, time management.

October 2018 - February 2019 Lead Android developer at Firstline Software (firstlinesoftware.com)

First project was a mid-size app, then I've took a leading position in a distributed team:

- App for tracking your sugar level
 - app's key feature is a custom view consist of a infinite graph with scaling and Bezier curve.
 - main components of a customView were a: Scroller, GestureDetector(switched to manual onTouch handling), logic was adopted from LinearLayoutManager
- Russian postal service app
 - This project started a long time ago, and contains a lot of legacy code
 - App consists of many different features, including payments, GeoFences, Launcher Widgets, AccountManager, Maps, etc.
 - My job was to coordinate 5 members Android team and implement features
 - writing unit tests for new features and support old tests

Key skills & technologies employed:

• Kotlin, Koin, RxPM, Moxy, Room, RxBindings, RxJava, Retrofit, JUnit, Mockito

September 2017 - October 2018

Android developer at MobileUp (mobileup.ru)

I have been taking part in development of several projects, from mid-scale to large ones

Key skills & technologies employed:

- Kotlin,
- RxPm(MVVM like library baked in MobileUp),
- RxJava, Dagger2, Koin, RxBinding, Conductor, web3j for blockchain
- Room, Architecture Components, BiometricPrompt, etc

February 2016 - August 2017

Android developer at 65apps (www.65apps.com)

I have been taking part in development of a mid-scale projects as a member of an Android team. I was responsible for developing different app features and support components.

Education

2017 – Current time Self education at Stepik, Coursera, Yandex praktikum, CSC courses (stepik.org)

During this period, I was mainly focused on mathematics and programming. Here is the list of courses that I've completed:

- Введение в математический анализ. Онлайн программа Stepik, CSC
- Линейная Алгебра Stepik, Онлайн программа Stepik, CSC
- Основы дискретной математики, Онлайн программа Stepik, CSC
- Теория вероятностей, Онлайн программа Stepik, CSC (almost done)
- Ликбез по дискретной математике, Stepik
- Программирование на языке C++, Stepik (almost done)
- Алгоритмы: теория и практика. Методы, Stepik
- Быстрый старт в спортивное программирование, Stepik, МФТИ.
- Algorithms, part1, Princeton, Coursera.
- Базовые алгоритмы Yandex praktikum.

2009 - 2013

Bachelor of Information Security at ISTU (istu.ru)

During my education, I've been focusing on the following topics:

- hidden electronic devices for listen in,
- hardware key interceptor, masked as a USB PS/2 adapter

Programming Languages

Languages

• Java, Kotlin, C++

Russian — mother tongue.English — TOEFL 93 score.

Development Tools & Technologies

• RxJava, Dagger2, Linux, Charles, Gradle

Hobbies

• road/gravel cycling, swimming, solving Stepik
